

**CALIFORNIA WATER ENVIRONMENT ASSOCIATION
SANTA CLARA VALLEY SECTION**

**DINNER MEETING
December 19th, 2019**

Topic: Energy Recovery through Co-Digestion

Anaerobic co-digestion of organic feedstocks increases resource recovery at municipal wastewater treatment facilities while diverting organics from landfills. This presentation will show you how to estimate potential biomethane production for a wide-range of digestible organics – including tonight's dinner. This approach provides a rational basis to estimate potential energy recovery for co-digestion project planning and pilot-scale and bench-scale process evaluation.

Speaker: Ron Appleton, Carollo Engineers, Inc.

Where: The Van's
"Restaurant on the Hill"
815 Belmont Ave.
Belmont, Ca. 94002
650-544-8267 Direct Cell
